The Syllabus is compiled by: *PhD in Medical Sciences, Associate Professor, Klimova N.V.*

The Syllabus

Psychiatry, medical psychology

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on August 12, 2020 No. 988)

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University, June 11, 2025, Record No. 5

The Syllabus was approved by the department

Multidisciplinary clinical training

PhD in Medical Sciences, Associate Professor, Klimova N.V.

1. COURSE OBJECTIVES	
1.1	Acquisition by students of systematized scientific knowledge about the etiology, pathogenesis, clinical picture, diagnosis, treatment and prevention of the most common and/or significant mental illnesses with an emphasis on identifying the main symptoms, syndromes and nosological forms; on examination, employment and rehabilitation of mentally ill patients; about systems ensuring the preservation, strengthening and restoration of mental health of the population; and also – development of the ability to determine the tactics of patient management, the formation of clinical thinking and professional competencies necessary within the framework of the professional activity of a doctor in the specialty “General Medicine”.
2. COURSE OVERVIEW	
Course code (in curriculum)	
2.1	Assumed background knowledge:
2.1.1	Ophthalmology
2.1.2	Neurology, medical genetics, neurosurgery
2.1.3	Pathological anatomy
2.1.4	Pathophysiology
2.1.5	Pharmacology
2.1.6	Biochemistry
2.1.7	Histology, embryology, cytology
2.1.8	Philosophy
2.1.9	Latin language
2.1.10	Chemistry
2.2	Post requisites:
2.2.1	Anesthesiology, resuscitation, intensive care
2.2.2	Clinical pharmacology
3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)	
GC-6.1: Defines the tasks of self-development and professional growth, distributes them into long-, medium- and short-term ones with a justification of their relevance and determination of the necessary resources for their implementation	
GC-6.2: Assesses the requirements of the labor market and educational services to build a trajectory for their own professional growth	
GC-9.1: Has an understanding of the principles of non-discriminatory interaction in communication in various spheres of life, taking into account the socio-psychological characteristics of persons with disabilities	
GC-9.2: Creates, within the framework of its professional activities, conditions for equal communication, social and professional self-realization of persons with disabilities	
GC-9.3: Interacts with persons with disabilities in the social and professional spheres	
PC-1.1: Demonstrates knowledge of etiology, pathogenesis, diagnostic criteria (clinical - subjective, physical, laboratory, instrumental) determines the patient's main pathological conditions, symptoms, disease syndromes and diagnoses nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems, X - XI revisions	
PC-1.2: Conducts differential diagnostics, evaluates the prognosis (short-, medium- and long-term) of the course of the disease, identifies acute complications and complications of chronic diseases	
PC-3.1: Examines the patient (collects and analyzes the patient's complaints, his anamnesis data, physical data based on the examination results, determines the necessary examination plan, evaluates laboratory parameters, instrumental, pathological and other research methods for the purpose of diagnosing diseases, evaluates the prognosis (short-, medium-, long-term) of its course and outcomes	
PC-3.2: Formulates a preliminary and clinical diagnosis in accordance with the International Statistical Classification of Diseases and Related Health Problems, 10th – 11th revisions and current clinical classifications	
PC-3.3: Conducts early and differential diagnostics of diseases	
PC-3.4: Carries out routing and management of patients based on current legislation (standards, procedures for the provision of medical care, Clinical guidelines)	
PC-5.1: Demonstrates knowledge of the mechanisms of action, methods of using pharmacotherapy, therapeutic nutrition, medical devices and methods of non-drug treatment, palliative and personalized medical care	

PC-5.2: Provides treatment to various categories of patients with diseases in outpatient settings, in hospitals and high-tech medical care (HMC) centers using drugs, medical devices and therapeutic nutrition taking into account the clinical picture, in accordance with current procedures, standards for the provision of medical care, clinical recommendations (treatment protocols)
PC-5.4: Demonstrates knowledge of the side effects of drugs, methods of their administration, knowledge of the duration of their use and evaluates the effectiveness and safety of the drug therapy, therapeutic nutrition and the use of non-drug treatment, therapeutic nutrition of palliative care
PC-8.2: Maintains medical records, including in electronic form

By mastering of the course students must:

3.1	Know:
3.1.1	the specifics of the subject and objectives of the discipline “psychiatry, medical psychology”;
3.1.2	morpho-functional, physiological states and pathological processes in the human body to solve professional problems of a psychiatric profile;
3.1.3	a methodology for collecting and analyzing patient complaints, his medical history, examination results, laboratory, instrumental, pathological, anatomical and other studies in order to recognize the condition or establish the presence or absence of a psychiatric disease;
3.1.4	main psychiatric pathological conditions, symptoms, disease syndromes, nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems, X revision;
3.1.5	tactics for managing patients with various nosological forms;
3.1.6	basic concepts used in psychiatry and medical psychology;
3.1.7	modern methods for diagnosing major human mental illnesses;
3.1.8	types and indications for the use of medications for psychiatric diseases;
3.1.9	types and indications for the use of non-drug methods of treating mental disorders;
3.1.10	prevention and rehabilitation in psychiatry;
3.1.11	principles of organizing psychiatric services.
3.2	be able to:
3.2.1	analyze significant pathological processes, correctly interpret and apply the basic concepts of psychiatry and medical psychology when studying biomedical and medical literature and when working together with medical specialists;
3.2.2	assess morpho-functional, physiological states and pathological processes in the human body to solve professional problems;
3.2.3	collect and analyze the patient’s complaints, his medical history, evaluate the results of examination, laboratory,
3.2.4	conduct differential diagnosis of human mental illnesses;
3.2.5	determine the patient’s main pathological conditions, symptoms, syndromes and nosological forms of mental disorders
3.2.6	determine tactics for managing patients with various nosological forms of mental disorders;
3.2.7	justify the need and prescribe medications and non-drug treatment for mental illness.
